" Mourners Recal a promise Jeppiaar had Kept !"

"Doing well is important, but your role in society as an Indian citizen is more important"

### *From the Directors desk...*

*The second edition of the news Letter of Jeppiaar Engineering college is released. The meticulous efforts that have been put in by the editorial board in compilation of data are commendable. It gives precious information about the activities in Jeppiaar Engineering college. I am sure that the effort of the editorial board will continue and bring JEC to the forefront.*

### *Editor's desk. . . .*

*It is an acknowledged fact that every generation has its own unique and distinctive ways of exploration. In the electronic era, it is extremely important for each one to keep abreast of the advancements of Science and Technology and provide his or her constructive contribution for furthering the exploration. Lacking in this exploration, even in case of any subject who is from the rural background, slows down the pace of the nation's growth. The active support for the government's campaigns in this direction should be offered by each citizen for the effective functioning of the centralized system. The initiatives recently embarked on by the Central Government, 'Digital India and Smart City' are typical cases at this juncture. The ideas behind the initiatives are to make the country electronically empowered in the field of technology and avail the utmost use of the city's assets using urban informatics and technology. This can be well achieved only if the present generation, particularly the student's community, keeps themselves involved actively. Their awareness, application, sharing of their technical knowledge in the social and academic circles and their exploration in the field of research — all these can force the pace of the initiatives. Let us extend a helping hand to put the initiatives through their paces.*
