From the Directors desk...

The third edition of the news Letter of Jeppiaar Engineering College is released. The meticulous efforts that have been put in by the editorial board in compilation of data are commendable. It gives precious information about the activities in Jeppiaar Engineering college. I am sure that the effort of the editorial board will continue and bring JEC to the forefront.

Editor's desk....

It is the need of hour for youngsters to look at the latest trends of the State and the Centre seriously. While globalization is expanding the availability of the advancements in science and technology significantly, its adverse effects on the social, cultural, political and health aspects of the people and the country are so profound that they (these effects) now seem to be irreparable. The repercussion is very much that what seemed to be instantly good is now a bitter pill to consume. As the proverb says, 'Any instant pleasure is always harmful', it is necessary to have some monitory restrictions on the principles of our adoption from the food we consume to the politicians we choose for, to lead the nation for the benefit of posterity. If an individual keeps utmost care for everything he or she comes across without taking anything for granted, the growth of the nation will be definitely guaranteed; if not, the growth is more or less a pipedream. The result is that all should suffer, not just the particular segment of the population.
