From the Directors desk...

The fourth edition of the news Letter of Jeppiaar Engineering college is released. The meticulous efforts that have been put in by the editorial board in compilation of data are commendable. It gives precious information about the activities in Jeppiaar Engineering college. I am sure that the effort of the editorial board will continue and bring JEC to the forefront.

Editor's desk....

NEET is a measured gambit. Though the examination is traumatic for rural students in all over India, it will be the need of the hour to avoid rampant commercialization in the field of education. There is a common perception that the NEET would be insurmountable for the vernacular medium students and those who are pursuing studies under the State and the Matriculation Board. But such kind of examination is in fact creating uniformity in higher studies and quality professionals instead of churning out shabby professionals disinterested in their fields but crazy for the lucrateness of their professions. Sooner or later, the examination may be applied for all the streams of education, including engineering. If so, it is extremely necessary that the teachers should be centrifugal and centripetal in their methodologies and the students should be studious in their academic pursuits. The students should keep their quality on par with the international standards. Meantime, the teachers must keep abreast of the latest trends and achievements in their fields. So that there should be some balance to make any health change in the field of education and overcome the challenges with ease. Or else, achieving any ambitious goal in the field he or she pursues will be a pipe dream.
